DOWNTOWN

Course Designer's Notes:

This course is a little more complicated than usual, so I thought a mental walkthrough would help. It should make for a fun drive, and be a little longer than normal.

At the start, you go through an optional slalom straight ahead, around the optional loop in the corner of the lot, and back through that same slalom again. After that, hang a left around the long sweeper, and head back to the optional loop once more. After your second time around the loop, return back towards the sweeper diagonally across the lot, but go straight this time, heading into the "lane-change" offset gates on the left side of the lot. You'll finish similar to one of last year's courses with a 180 degree right-hander, followed by a similar left-hander before crossing the finish lights.

If you find this confusing, find myself or another experienced autocrosser to help. As always, there will be a novice walkthrough that is open to anyone who needs a little help.

Thanks, and enjoy your day!
Mark Rivera
